PROFESSIONAL SUMMARY

Backend Developer with 1+ years of experience in designing and developing scalable backend applications using Spring Boot and Laravel. Skilled in RESTful API development, JWT based authentication, and Role-Based Access Control (RBAC). Experienced in database optimization and delivering secure, production ready systems. Proven ability to troubleshoot complex issues and improve system performance.

TECHNICAL SKILLS

- **Backend Development:** Java, Spring Boot, Laravel
 - **Frontend Technologies:** HTML5, CSS3, JavaScript
 - **Database Management:** MySQL, SQL (Query Optimization, Performance Tuning)
 - **Architecture & Design:** REST API Development, MVC Architecture, API Design Principles
 - **Security & Authentication:** JWT Authentication, Role-Based Access Control (RBAC)
 - **Tools & Technologies:** Git, Postman(API Testing)
-

PROFESSIONAL EXPERIENCE

Backend Developer – Hyperion Tech

Jan 2025 – Jan 2026

- Developed and maintained scalable backend services using Spring Boot, Laravel, and MySQL
- Designed, built, and deployed RESTful APIs for production grade applications
- Implemented secure authentication and authorization mechanisms using JWT and Role-Based Access Control
- Optimized SQL queries and database performance to enhance application efficiency
- Improved API response time by 30% through query optimization.
- Diagnosed, debugged, and resolved production issues, improving system reliability and uptime
- Collaborated with frontend developers to ensure seamless API integration and data flow

Key Achievements

- Developed reusable authentication modules adopted across multiple applications, reducing development time
 - Standardized access control mechanism, improving API security and consistency
 - Reduced recurring production defects through structured debugging and root cause analysis
-

PROJECTS

Ticket Management System

Tech Stack: Spring Boot, MySQL

- Developed scalable backend services to manage the complete ticket lifecycle (creation, assignment, resolution)
- Implemented secure authentication, file upload handling, notification systems, and centralized logging, reducing manual tracking efforts by 40%
- Designed relational database schema and built RESTful APIs, improving data retrieval efficiency by 30%

Elderly Care Platforms (NDIS & SSF System)

Tech Stack: Spring Boot, MySQL

- Built secure authentication and authorization modules, ensuring 100% compliance with role-based access requirements
- Developed backend services supporting healthcare workflows, improving operational efficiency by 25%
- Contributed to scalable API design, enabling the system to handle concurrent user operations with minimal latency

E-Commerce Platform (Crowe Surfboard)

Tech Stack: Laravel, MySQL

- Developed backend modules for product, order, and user management, supporting end-to-end e-commerce operations.
- Improved API performance through query optimization, reducing response time by 35%
- Enhanced code maintainability and reusability, decreasing future development effort by 20%

CERTIFICATION

- Oracle Certified Foundations (Java, DBMS)
- SQL – Infosys Springboard
- C Essentials – Cisco
- HTML5 Application Development – Criativo

EDUCATION

Bachelor of Science – Mathematics, Statistics & Computer Science

Aditya Degree College | 2022 – 2025
